4 moves of a dyadic episode

DeepSeek-V4-Flash on both sides · S2 · hybrid protocol · each player owns three of the six objects and sees the other three only as X

T1 Player A …My A target is (R5,C3), so please clear that cell for me; I can adapt once your X moves. PLAN: move D from (R2,C1) to (R1,C5) — REQUEST: clear R5C3 for A

`move: D right`

T2 Player B Moving B down to R6C3 frees R5C3 for your A. Please move X at R6C2 left to R6C1 so B can finish at R6C2… PLAN: move B from (R5,C3) to (R6,C2) — REQUEST: move X from (R6,C2) to (R6,C1)

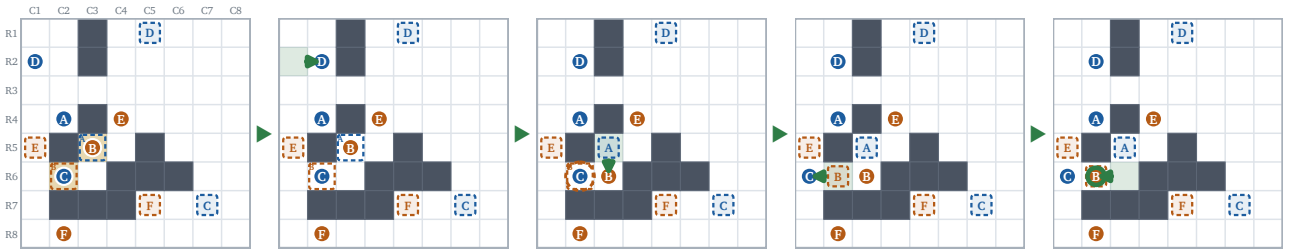
`move: B down`

T3 Player A Moving C left to R6C1, freeing R6C2 for B as you asked… PLAN: move C from (R6,C2) to (R7,C7) — REQUEST: move B to (R6,C2); clear (R4,C4) for A

`move: C left`

T4 Player B Taking B into R6C2 now, as planned. I'll move E right to R4C5 next, freeing R4C4 so A can pass… PLAN: move B from (R6,C3) to (R6,C2) — REQUEST: hold D off (R3,C2)-(R3,C4) until E passes

`move: B left`



start

A owns A C D · B owns B E F

A ← B ← C: A's target is B's cell, B's target is C's cell

T1

A: move D right

T2

B: move B down

the "X at R6C2" in B's request is in fact A's own C

T3

A: move C left

T4

B: move B left

B reaches its target: 3 turns of channel, one cell

Player A's object · Player B's object · target cell · wall · the move made this turn · on target
