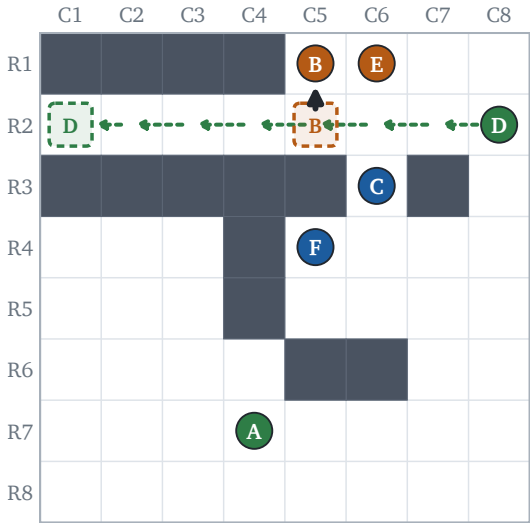
(a) freeform

action 26: Orange moves B off its target



Orange **action 14**

"… when D reaches (R2,C6), I can shift B up temporarily to (R1,C5), then return. …"

Green **action 22**

"… Orange: please do NOT declare done yet; wait for D at (R2,C7), shift B up to (R1,C5) so D can pass through (R2,C5), then return B to (R2,C5). …"

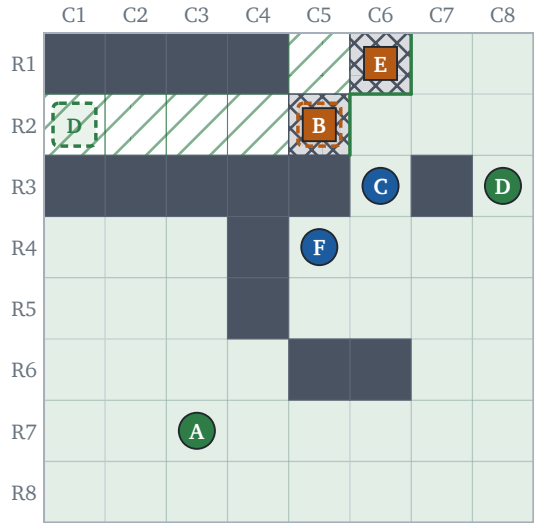
Orange **action 26**

"Moving B up to (R1,C5) now to clear (R2,C5) for D. …"

D passes the entrance at action 35; B returns at 38, Orange declares done at 40; won at 53.

(b) structured

action 26: Orange declares done



Orange **action 20**

"… REQUEST: C vacate (R1,C6); B clears (R2,C5) next"

Green **action 22**

"… REQUEST: please clear (R2,C5) for D"

Green **action 25**

"… REQUEST: B clear (R2,C5) for D"

Orange **action 26**

done

B is frozen on the entrance and D cannot reach its target; lost by the cycle rule after action 34.

object, colour = owner (Green, Orange, Blue)

declared done: object frozen (square)

target of B (entrance) and D (dead end)

where D can still move

D's way to its target

cells D loses to the done
